Explanations	

Türk Telekom Group continues taking important steps towards future not only to meet today's needs but also to ensure sustainability for tomorrow. Our vision, driven by innovation and responsibility, aims for us to take leadership in environmental and social areas as well as in the business world. In this journey, we are taking concrete actions to reduce our carbon footprint and increase our contribution to environmental sustainability.

Within this context, our Sustainability Committee, which reports to the Board of Directors, has agreed upon targeting a 45% reduction in Türk Telekom Group's Scope 1 & 2 emissions in total by 2030 relative to the base year of 2020 and reach Net Zero by 2050, in alignment with Türkiye and GSMA targets. Going beyond a percentage reduction target, our commitment is a testimony of the responsibility for creating a sustainable future, we believe.

We will carry out the targets set out by our Sustainability Committee with the support of our Board of Directors, employees and other stakeholders. We will soon join the "Science-Based Targets Initiative" (SBTi) in accordance with global sustainability standards to reaffirm our commitment. This step will reinforce our sustainability ambitions and pave the way for us to transparently demonstrate that our future strategies are based on scientific grounds.

We proclaim that our above disclosure is in conformity with the principles set down in "Material Events Communiqué" of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we're personally liable for the disclosures.
