All of the branches are included in the condensed consolidated interim financial statements.

2. BASIS OF PRESENTATION OF CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

2.1 Statement of Compliance to TAS

The accompanying consolidated financial statements are prepared in accordance with the requirements of CMB Communiqué Serial II, No: 14.1 "Basis of Financial Reporting in Capital Markets" ("Communiqué"), which were published in the Official Gazette No: 28676 on 13 June 2013 and in accordance with the Turkish Accounting Standards and Interpretations ("TAS") that have been put into effect by the Public Oversight Accounting and Auditing Standards Authority ("POASA").

The condensed consolidated financial statements of the Group for the quarter ended 30 September 2018 are prepared in accordance with TAS 34 "Interim Financial Reporting". Interim condensed consolidated financial statements do not include all the information and disclosures required to be included in the annual financial statements and should be read in conjunction with the annual financial statements prepared by the Group as at 31 December 2017.

The changes in significant accounting policies are explained in note 2.2.

Preparation of the Consolidated Financial Statements

The consolidated financial statements and its notes are presented in accordance with the requirements announced by the CMB's announcement on 7 June 2013.

These consolidated financial statements have been approved for issue by the Board of Directors on 30 October 2018 with the resolution number 1025 No authority other than General Assembly and legal entities has the right to amend the consolidated interim financial statements.

Functional and Presentation Currency

The individual financial statements of each Group entity are presented in the currency of the primary economic environment ("Functional Currency") in which the entity operates. The Company's reporting currency is Turkish Lira ("TL"). For the purpose of the consolidated financial statements, the results and financial position of each entity are expressed in TL, which is the functional, and presentation currency of the Company for the condensed consolidated interim financial statements.

All amounts have been rounded to the nearest thousand, unless otherwise indicated and are expressed in thousands of TL or Foreign Currency unless otherwise stated. Kuruş is Turkish Currency subunit and 1 TL is equal to 100 Kuruş.

Accounting in hyperinflationary economies

CMB, with its resolution dated 17 March 2005 numbered 11/367 declared that companies operating in Turkey which prepare their financial statements in accordance with CMB Accounting Standards, effective 1 January 2005, will not be subject to the application of inflationary accounting. Consequently, in the accompanying financial statements ("IAS/TAS 29") "Financial Reporting in Hyperinflationary Economies" has not been applied since 1 January 2005.

(Amounts are expressed in thousands of TL and in thousands of "Foreign Currency" unless otherwise stated.)

2. BASIS OF PRESENTATION OF CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)**2.1 The Basis of Presentation (continued)****Basis of Consolidation****Subsidiaries**

The details of the of the Group are as follows:

Subsidiaries	Location	Functional Currency	Group's proportion of ownership and voting power held (%)		Main Activity
			30 September 2018	31 December 2017	
ASELSANNET	Turkey	TL	100	100	Communication systems
ASELSAN Baku	Azerbaijan	AZN	100	100	Marketing and sales of the group products
Mikro AR-GE	Turkey	TL	85	85	Microelectronic R&D projects
ASELSAN Malaysia ¹	Malaysia	MYR	100	100	Remote controlled weapon systems

The consolidated financial statements include the financial statements of the Company and entities controlled by the Company and its subsidiaries. Control is achieved when the Group:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee;
- and
- has the ability to use its power to affect its returns

The Group reassesses whether or not it controls an investee when if facts and circumstances arise there are changes to one or more of the three elements of control listed above.

Even though the Group has voting rights less than a majority, if it has ability to manage the operation of the investee unintentionally, then the Group assess that it has control over that investee. The Group considers all relevant facts and circumstances in assessing whether or not the Group's voting rights in an investee are sufficient to give it power, including:

- Comparison of voting rights of the Group and the others,
- Potential voting rights held by the Group, and others,
- Rights arising from other contractual arrangements; and
- Any additional facts and circumstances that indicate the Group has, or does have, the current ability to direct the relevant activities at the time that decisions need to be made (including voting patterns at previous shareholders' meeting).

¹ "ASELSAN Malaysia Sdn. Bhd." has been established in order to operate in the field of remote controlled weapon systems, of which ASELSAN owns present 100. The Company's capital is MYR 100, and the establishment has been registered in July 2017. According to the new business and project potentials in Malaysia, the Company has a plan to grow and establish local partnerships.

2. BASIS OF PRESENTATION OF CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)**2.1 The Basis of Presentation (continued)****Basis of Consolidation (continued)****Subsidiaries (continued)**

The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases. Income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Each item of profit or loss and other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to align with the Group accounting policies.

All intragroup assets and liabilities, equity, income and expenses, profits and losses and cash flows relating to transactions between members of the Group are eliminated during consolidation.

Joint Ventures:

The details of the Group's interests in joint ventures as of the dates 30 September 2018 and 31 December 2017 are as follows:

b) TFRS 15 Revenue from Contracts with Customers

TFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognised. It replaces existing revenue recognition guidance, including TAS 18 Revenue, TAS 11 Construction Contracts and TFRYK 13 Customer Loyalty Programmes.

General model for revenue recognition

TFRS 15 requires revenue recognition for all contracts with customers to follow the five-step approach to revenue recognition.

Step 1: Identifying the contract with customers

A contract exists only if it is legally enforceable, the collection of the consideration is probable, the rights to goods and services and payment terms can be identified, the contract has commercial substance; and the contract is approved and the parties are committed to their obligations.

If either contracts were negotiated as a single commercial package, or consideration in one contract depends on the other contract or goods or services (or some of the goods or services) are a single performance obligation the Group accounts the contracts as a single contract.

Step 2: Identifying the performance obligations

Group defines 'performance obligation' as a unit of account for revenue recognition. The Group assesses the goods or services promised in a contract with a customer and identifies as a performance obligation either a good or service that is distinct; or a series of distinct goods or services that are substantially the same and have the same pattern of transfer to the customer.

A contract may contain promises to deliver a series of distinct goods or services that are substantially the same. At contract inception, an entity determines whether the series of goods or services is a single performance obligation.

b) TFRS 15 Revenue from Contracts with Customers (Continued)

Step 3: Determining the transaction price

In order to determine the transaction price, the Group assesses how much consideration it expects to be entitled to by fulfilling the contract. In arriving at the assessment, the Group considers variable elements of consideration, as well as the existence of a significant financing component.

Significant financing component

The Group revises the promised amount of consideration for the effect of a significant financing component to the amount that reflects what the cash selling price of the promised good or service.

As a practical expedient, the Group does not adjust the transaction price for the effects of a significant financing component if, at contract inception, the entity expects the period between customer payment and the transfer of goods or services to be one year or less. In cases where advance for the services are received and the payment scheme is broadly aligned with the Group's performance throughout the period, the Group concludes that the period between performance and payment is never more than 12 months, therefore the expedient is applied.

Variable consideration

The Group identifies items such as price concessions, incentives, performance bonuses, completion bonuses, price adjustment clauses, penalties, discounts, credits, or similar items may result in variable consideration if there is any in a customer contract.

Step 4: Allocating the transaction price to performance obligations

If distinct goods or services are delivered under a single arrangement, then the consideration is allocated based on relative stand-alone selling prices of the distinct goods or services (performance obligations). If directly observable stand-alone selling prices are not available, the total consideration in the service contracts is allocated based on their expected cost plus a margin.

Step 5: Revenue Recognition

The Group recognises revenue over-time if any of the following conditions is met:

- customer simultaneously receives and consumes the benefits as the entity performs, or
- the customer controls the asset as the entity creates or enhances it, or
- Group's performance does not create an asset for which the entity has an use; and alternative there is a right to payment for performance to date.

For each performance obligation that is satisfied over time, an entity selects a single measure of progress, which depicts the transfer of control of the goods or services to the customer. The Group uses a method that measures the work performed reliably.

The Group uses cost incurred to measure the progress towards to completion of the project where the input method is used and uses units transferred to measure the progress towards to completion of the project where the output method is used.

If a performance obligation is not satisfied over time, then the Group recognise revenue at the point in time at which it transfers control of the good or service to the customer.

The Group recognises a provision in accordance with TAS 37 "Provisions, Contingent Liabilities and Contingent Assets" when the unavoidable costs of meeting the obligations under a contract exceed the economic benefits.

2. BASIS OF PRESENTATION OF CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)**2.2 Comparative Information and Restatement of Prior Period Consolidated Financial Statements (continued)****b) TFRS 15 Revenue from Contracts with Customers (continued)****Contract modifications**

The Group recognises a contract modification as a separate contract if the modification results in a promise to deliver additional goods or services that are distinct and an increase in the price of the contract by an amount of consideration that reflects the entity's stand-alone selling price of those goods or services adjusted to reflect the circumstances of the contract.

If the goods or services are distinct, then the entity accounts for the modification as if it were a termination of the existing contract and the creation of a new contract. If the modification to the contract does not add distinct goods or services, then the entity accounts for it on a combined basis with the original contract, as if the additional goods or services were part of the initial contract.

Impacts identified

The details of the new significant accounting policies and the nature of the changes to previous accounting policies in relation to the Group's various goods and services are set out below

Under TFRS 15, revenue is recognized when a customer obtains control of the goods or services. Determining the timing of the transfer of control – at a point in time or over time – requires judgement.

Type of product/service	Nature, timing of satisfaction of performance obligations, significant payment terms	Nature of change in accounting policy
Product sales	Customers obtain control of products when the goods are delivered to and have been accepted at their premises. Invoices are generated and revenue is recognized at that point in time. Invoices are usually payable within 1 year.	Under TAS 18, revenue for these contracts or orders was recognized when a reasonable estimate of the returns could be made, provided that all other criteria for revenue recognition were met. If a reasonable estimate could not be made, then revenue recognition was deferred until the return period lapsed or a reasonable estimate of returns could be made. There has been no significant impact in the financial statements resulting from the sale of products due to the application of TFRS 15 accounting policies.
Long term contracts	Long term contracts include the design, production integration and delivery of a product or a group of products. Design is available for the customer and customer can benefit from design on its own or together with other readily available resources. Whether the client has the intellectual and industrial property rights to the design are specified in the contracts.	Under TAS 11 "Construction contracts" where the outcome of a contract could be estimated reliably, revenue was recognised over the the contract term. The Group used the "percentage of completion method" to determine the appropriate amount to recognise in a given period. The stage of completion was measured by the reference to the contracts cost incurred up to the reporting date as a percentage of total estimated cost for each contract.

b) TFRS 15 Revenue from Contracts with Customers (continued)

Type of product/service	Nature, timing of satisfaction of performance obligations, significant payment terms	Nature of change in accounting policy
Long term contracts	<p>Design creates a customer specific asset with no alternative use to the Group. Production and integration is to make the designed product ready for economic benefit for the customer. It is clearly stated in the contracts whether the Group has a legally enforceable right to payment for performance completed to date. The contract may include an advance payment. Advance payments help to ensure the financing of the Group to meet its obligations. The Group's long term contracts may include technology acquisition, training, maintenance-repair, and spare parts delivery obligations other than design and production. Performance obligations that do not meet the criteria for over time revenue recognition are accounted for point in time using output method.</p>	<p>For long term contracts, TFRS15 had a significant impact on the Group's accounting policies. In long-term contracts, performance obligations are classified as design, production and other. Other performance obligation consists of acquisition of technology, training, maintenance-repair, delivery of spare parts. Transaction prices include a significant financing component due to the long term nature of contracts and the inclusion of advance payments. The timing of payments provides a significant benefit to the customer or business by financing the transfer of goods or services to the customer. The performance obligations that meet the over time revenue recognition criteria are measured by the input method and are accounted for by the percentage of completion method. If a performance obligation does not meet the over time criteria, it is accounted for at a point in time. Revenue is recognized when the Customer takes control of the promised asset. TFRS 15 has significant effects for long term contracts for two main reasons:</p> <p>a) Changes on methods of recognition of revenue With the TFRS 15, it has been assessed that some of the performance obligations of these contracts do not meet the over time accounting criteria, and revenue is recognized at a point in time and with the output method. The impact of this change on the financial statements is presented in the note 2.2 b.</p> <p>b) Significant financing component Under TFRS 15, for long term contracts involving an important financing component, when the contracted goods or services are transferred, the contract price is adjusted to reflect the cash selling price. The impact of this change on the financial statements is presented in the note 2.2 b.</p>

2. BASIS OF PRESENTATION OF CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)**2.2 Comparative Information and Restatement of Prior Period Consolidated Financial Statements (continued)****TFRS 9 Financial Instruments**

TFRS 9 Financial Instruments sets out requirements for recognising and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items. This standard replaces TAS 39 Financial Instruments: Recognition and Measurement.

i. Classification – Financial assets

TFRS 9 contains a new classification and measurement approach for financial assets that reflects the business model in which assets are managed and their cash flow characteristics.

TFRS 9 contains three principal classification categories for financial assets: measured at amortised cost, Fair Value Through Other Comprehensive Income ("FVOCI") and Fair Value Through Profit or Loss ("FVTPL"). The standard eliminates the existing TAS 39 categories of held to maturity, loans and receivables and available for sale. Financial investments classified as "Available for Sale Financial Assets" in accordance with TAS 39 are classified as FVOCI in accordance with TFRS 9.

Under TFRS 9, derivatives embedded in contracts where the host is a financial asset in the scope of the standard are never bifurcated. Instead, the hybrid financial instrument as a whole is assessed for classification. The Group does not have any embedded derivatives as of reporting date.

ii. Impairment – Financial assets and contract assets

TFRS 9 replaces the 'incurred loss' model in TAS 39 with a forward-looking 'expected credit loss' (ECL) model. This requires considerable judgement about how changes in economic factors affect ECLs, which is determined on a probability-weighted basis.

The new impairment model applies to financial assets measured at amortised cost or FVOCI, except for investments in equity instruments, and to contract assets.

Under TFRS 9, loss allowances are measured on either of the following bases:

- 12-month ECLs: these are ECLs that result from possible default events within the 12 months after the reporting date; and
- lifetime ECLs: these are ECLs that result from all possible default events over the expected life of a financial instrument.

Lifetime ECL measurement (simplified approach) is always applied to trade receivables and contract assets without a significant financing component.

iii. Classification – Financial liabilities

TFRS 9 largely retains the existing requirements in TAS 39 for the classification of financial liabilities.

However, under TAS 39 all fair value changes of liabilities designated as at FVTPL are recognised in profit or loss, whereas under TFRS 9 these fair value changes are generally presented as follows:

the amount of change in the fair value that is attributable to changes in the credit risk of the liability is presented in OCI; and the remaining amount of change in the fair value is presented in profit or loss.

(Amounts are expressed in thousands of TL and in thousands of "Foreign Currency" unless otherwise stated.)

2. BASIS OF PRESENTATION OF CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

2.2 Comparative Information and Restatement of Prior Period Consolidated Financial Statements (continued)

TFRS 9 Financial Instruments (continued)

iv. Hedge accounting

When initially applying TFRS 9, the Group may choose as its accounting policy to continue to apply the hedge accounting requirements of TAS 39 instead of the requirements in TFRS 9. During selection of the accounting policies, TFRS 9 gives option of continuing with TAS 39 hedge accounting principles and deferring hedge accounting rules in accordance with TFRS 9. The Group does not apply hedge accounting.

2.3 Accounting Policies, Changes in Accounting Estimates and Errors

Significant changes in accounting policies and errors are applied retrospectively and prior period financial statements are restated, changes in accounting estimates are reflected to the financial in current period profit/loss.

When change in estimate in accounting policies are related with only one period, changes are applied on the current period but if the estimated changes are for the following periods, changes are applied both on the current and following periods prospectively.

2.4 Summary of Significant Accounting Policies

Standards Issued But Not Yet Effective and Not Early Adopted as of 30 September 2018

Standards Issued But Not Yet Effective and Not Early Adopted

Standards, interpretations and amendments to existing standards that are issued but not yet effective up to the date of issuance of the consolidated financial statements are as follows. The Group will make the necessary changes if not indicated otherwise, which will be affecting the consolidated financial statements and disclosures, after the new standards and interpretations become in effect.

Amendments to TFRS 9 - Prepayment features with negative compensation

In December 2017, POASA has issued amendments to TFRS 9 to clarify that financial assets containing prepayment features with negative compensation can now be measured at amortised cost or at fair value through other comprehensive income (FVOCI) if they meet the other relevant requirements of TFRS 9. Under TFRS 9, a prepayment option in a financial asset meets this criterion if the prepayment amount substantially represents unpaid amounts of principal and interest, which may include 'reasonable additional compensation' for early termination of the contract. The amendments are effective for periods beginning on or after 1 January 2019, with earlier application permitted.

The Group is assessing the potential impact on its consolidated financial statements resulting from the application of the amendments to TFRS 9.

In December 2017, POASA has issued amendments to TAS 28 to clarify that entities also apply TFRS 9 to other financial instruments in an associate or joint venture to which the equity method is not applied. These include long-term interests that, in substance, form part of the entity's net investment in an associate or joint venture. An entity applies TFRS 9 to such long-term interests before it applies related paragraphs of TAS 28. In applying TFRS 9, the entity does not take account of any adjustments to the carrying amount of long-term interests that arise from applying TAS 28. The amendments are effective for periods beginning on or after 1 January 2019, with earlier application permitted.

The Group is assessing the potential impact on its consolidated financial statements resulting from the application of the amendments to TAS 28.

TFRS 16 Leases

On 13 January 2016, IASB issued the new leasing standard which will replace TAS 17 Leases, IFRIC 4 Determining Whether an Arrangement Contains a Lease, SIC 15 Operating Leases – Incentives, and SIC 27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease and consequently changes to TAS 40 *Investment Properties*. TFRS 16 *Leases* eliminates the current dual accounting model for lessees, which distinguishes between on-balance sheet finance leases and off-balance sheet operating leases. Instead, there is a single, on-balance sheet accounting model that is similar to current finance lease accounting. Lessor accounting remains similar to current practice. The standard is effective for annual periods beginning on or after 1 January 2019, with early adoption permitted provided that an entity also adopts TFRS 15 *Revenue from Contracts with Customers*. The Group is assessing the potential impact on its consolidated financial statements resulting from the application of TFRS 16.

TFRYK 23 –Uncertainty Over Income Tax Treatments

On 17 June 2017, IASB issued TFRYK 23 Uncertainty over Income Tax Treatments to specify how to reflect uncertainty in accounting for income taxes. It may be unclear how tax law applies to a particular transaction or circumstance, or whether a taxation authority will accept a company's tax treatment. TAS 12 Income Taxes specifies how to account for current and deferred tax, but not how to reflect the effects of uncertainty. IFRIC 23 provides requirements that add to the requirements in TAS 12 by specifying how to reflect the effects of uncertainty in accounting for income taxes. The Interpretation is effective from 1 January 2019 with earlier application is permitted. The Group is assessing the potential impact on its consolidated financial statements resulting from the application of TFRYK 23.

(Amounts are expressed in thousands of TL and in thousands of "Foreign Currency" unless otherwise stated.)

2. BASIS OF PRESENTATION OF CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)**2.4 Summary of Significant Accounting Policies (continued)*****The new standards, amendments and interpretations that are issued by the International Accounting Standards Board (IASB) but not issued by POASA***

The following standards, interpretations and amendments to existing TFRS standards are issued by the IASB but these standards, interpretations and amendments to existing TFRS standards are not yet adapted/issued to TFRS by the POASA, thus they do not constitute part of TFRS. Such standards, interpretations and amendments that are issued by the IASB but not yet issued by the POASA are referred to as TFRS or TAS. The Group will make the necessary changes to its consolidated financial statements after the new standards and interpretations are issued and become effective under TFRS.

Annual Improvements to TFRSs 2015-2017 Cycle**Improvements to TFRSs**

TASB issued Annual Improvements to TFRSs - 2015–2017 Cycle. The amendments are effective as of 1 January 2019. Earlier application is permitted. The Group does not expect that application of these improvements to TFRSs will have significant impact on its consolidated financial statements.

TFRS 3 Business Combinations and TFRS 11 Joint Arrangements

TFRS 3 and TFRS 11 are amended to clarify how a company accounts for increasing its interest in a joint operation that meets the definition of a business. If a party obtains control, then the transaction is a business combination achieved in stages and the acquiring party remeasures the previously held interest at fair value. If a party maintains (or obtains) joint control, then the previously held interest is not remeasured.

TAS 12 Income Taxes

TAS 12 is amended to clarify that all income tax consequences of dividends (including payments on financial instruments classified as equity) are recognised consistently with the transactions that generated the distributable profits – i.e. in profit or loss, other comprehensive income (OCI) or equity.

TAS 23 Borrowing Costs

TAS 23 is amended to clarify that the general borrowings pool used to calculate eligible borrowing costs excludes only borrowings that specifically finance qualifying assets that are still under development or construction. Borrowings that were intended to specifically finance qualifying assets that are now ready for their intended use or sale – or any non-qualifying assets – are included in that general pool.

Amendments to TAS 19 - Plan Amendment, Curtailment or Settlement -

On 7 February 2018, TASB issued Plan Amendment, Curtailment or Settlement (Amendments to TAS 19). The amendments clarify the accounting when a plan amendment, curtailment or settlement occurs. A company now uses updated actuarial assumptions to determine its current service cost and net interest for the period; and the effect of the asset ceiling is disregarded when calculating the gain or loss on any settlement of the plan and is dealt with separately in other comprehensive income (OCI). The amendments are effective for periods beginning on or after 1 January 2019, with earlier application permitted.

The Group is assessing the potential impact on its consolidated financial statements resulting from the application of the amendments to TAS 19.

The revised Conceptual Framework issued on 28 March 2018 by the TASB. The Conceptual Framework sets out the fundamental concepts for financial reporting that guide the Board in developing TFRS Standards. It helps to ensure that the Standards are conceptually consistent and that similar transactions are treated the same way, so as to provide useful information for investors, lenders and other creditors. The Conceptual Framework also assists companies in developing accounting policies when no TFRS Standard applies to a particular transaction, and more broadly, helps stakeholders to understand and interpret the Standards. The revised Framework is more comprehensive than the old one – its aim is to provide the Board with the full set of tools for standard setting. It covers all aspects of standard setting from the objective of financial reporting, to presentation and disclosures. For companies that use the Conceptual Framework to develop accounting policies when no TFRS Standard applies to a particular transaction, the revised Conceptual Framework is effective for annual reporting periods beginning on or after 1 January 2020, with earlier application permitted.

TFRS 17 –Insurance Contracts

On 18 May 2017, TASB issued TFRS 17 Insurance Contracts. This first truly globally accepted standard for insurance contracts will help investors and others better understand insurers' risk exposure, profitability and financial position. TFRS 17 replaces TFRS 4, which was brought in as an interim Standard in 2004. TFRS 4 has given companies dispensation to carry on accounting for insurance contracts using national accounting standards, resulting in a multitude of different approaches. As a consequence, it is difficult for investors to compare and contrast the financial performance of otherwise similar companies. TFRS 17 solves the comparison problems created by TFRS 4 by requiring all insurance contracts to be accounted for in a consistent manner, benefiting both investors and insurance companies. Insurance obligations will be accounted for using current values – instead of historical cost. The information will be updated regularly, providing more useful information to users of financial statements. TFRS 17 has an effective date of 1 January 2021 but companies can apply it earlier.

The Group does not expect that application of TFRS 17 will have significant impact on its consolidated financial statements.

"Deferred Tax Assets" of the Group as of 30 September 2018 is TL 621.200. The amount is comprised of the items below.

	30 September 2018	(Restated) 31 December 2017
Carried Forward R&D Incentives Effect	1.045.358	772.334
Temporary Differences	(424.158)	(121.559)
Deferred Tax Assets - Net	621.200	650.775

In accordance with the law numbered 5746 pertaining to 1 January-30 September 2018 period. the Group has calculated "Deferred Tax Asset" amounting to TL 1.045.358 from Research and Development expenses comprising "Outstanding Research and Development Deductions".

The earnings gained within the scope of Technology Development Zones Law numbered 4691 were exempted from corporate tax until 31 December 2023.

Prospective profit/loss projection and forecasts and expected duration of research and development incentives are considered in calculating deferred tax asset.

	30 September 2018	(Restated) 30 September 2017
Profit before tax from continuing operations	1.774.617	616.216
Tax income recognized in profit or loss	(39.083)	136.110
Effective tax rate	(%2)	%22

Effective tax rate is calculated by dividing profit before tax from continuing operations to tax income recognized in profit or loss. Increase in profit before tax from continuing operations is mainly due to the sales made by the Company within the current period. The Company does not have corporate tax liability for the current period because of the tax advantage arising from the R&D expenditures the Company has made in the previous years. The main reason for tax income in profit or loss is deferred tax income effect arising from the R&D expenditures the Company has made within the current period.

13. EMPLOYEE BENEFITS (continued)

Provision for severance pay (continued)

Certain provisions regarding services before retirement, has been annulled on 23 May 2002 during the revision of the related law. As of 30 September 2018 severance payments are calculated on the basis of 30 days' pay, limited to a ceiling of TL¹ 5.434 (31 December 2017: TL¹ 4.732).

As of 1 July 2018, severance payments are limited to a ceiling of TL¹ 5.434 .

The liability is not funded, as there is no funding requirement. The provision has been calculated by estimating the present value of the future probable obligation of the Group arising from the retirement of employees. TAS 19 ("Employee Benefits") requires actuarial valuation methods to be developed to estimate the entity's obligation.

Provision for retirement grant:

Retirement bonus provision is recognized for the employees with service of minimum 20 years within the Group and has earned/will earn their retirement.

Accordingly, the following actuarial assumptions were used in the calculation of the total liability:

22. FOREIGN EXCHANGE POSITION (continued)**Foreign currency sensitivity**

The Group is exposed to foreign currency risk with respect to USD and EURO. As of 30 September 2018, USD 1: TL 5,9902 (31 December 2017: TL 3,7719), EURO 1: TL 6,9505 (31 December 2017: TL 4,5155).

The following table details the Group's sensitivity to a 10 percent increase and decrease in foreign exchange rates. 10 percent is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and presents 10 percent change in foreign currency rates. This analysis does not include Group companies' balance sheet items which have functional currency other than TL. The effects of 10 percent changes in foreign currency rate on financial statements is as follows;
