Risk Management and Internal Control Mechanism

Pursuant to the applicable provisions of the Turkish Commercial Code, the Early Detection of Risk Committee, which is charged with early diagnosis of risks that may threaten the existence, development and survival of the Company, and with ensuring that necessary actions are taken in relation to those risks, carried on with its activities.

Within the scope of the activities conducted with the Company employees, the Committee follows up various risk indicators, which have been created to ensure identification of the risks that could preclude the achievement of the Company's strategic business goals, to monitor the factors that make up these risks, to determine and measure the probability and impact of the risks, and follows up the risk criteria deemed important.

These risk indicators are analyzed and followed up by the related Company units, and changes are monitored by the Risk Committee. In periodic meetings, the Risk Committee evaluates whether appropriate actions have been taken.

The company's exposure to the fluctuations in foreign exchange rates and interest rates is mainly due to the foreign exchange denominated loans in its Balance Sheet. The Company's shareholders' equity has decreased in the last periods. Foreign exchange risk from loans and fluctuations in Euribor rates are continuously monitored and limited by hedging derivative instruments. Detailed information has been provided at Note 22, titled Exchange Rate Risk and Foreign Currency Position, of Condensed Consolidated Financial Statements for the Interim Period 1 January – 30 June 2019 of the Company.

Risk management is implemented by each subsidiary within the framework of policies decided by the Board of Directors.

The Early Recognition of Risk Committee, which convenes 6 times a year, coordinates to take precaution against predictable risks that the company might face as a result of its financial structure and reports regularly to the Board of Directors about its practices. As mentioned above, the maturity of the Company's current Euro debt is extended via refinancing and some portion of the debt is converted to Turkish Lira. Thus, the currency risk is limited. Reducing the Company's financial indebtedness (particularly hard currency debts) is one of the priorities of the senior management.

In the conduct and performance of its financial and operational reviews, the Internal Audit Department adheres to the following principles.

- Effective utilization of the resources of the Company,
- Effectiveness of the internal control mechanisms on operations,
- Reliability of financial statements,
- Confirmation of Company assets
- Efficiency and effectiveness of business operations,
- Compliance of employees with the quality management documentation and administrative instructions approved by the management,

The fundamental duties of the Internal Audit Department consist, among other things, of investigating/examining activities and transactions which previously had been determined and reported as having elements of risk in order to ascertain the degree to which such risks have been eliminated or brought under control in line with management-approved recommendations; performing follow-up reviews in situations where more detailed investigations and examinations are necessary.

Any problems that may be discovered during the course of review activities are investigated in detail with the aim of allowing measures to be taken as necessary while recommendations are also made concerning what action should be taken to deal with any losses which the Company is ascertained to have suffered. In all of these efforts, altering processes in such a way as to prevent recurrences of similar incidents is an issue of fundamental concern.

In line with the risk based audit approach and the year's internal control plan, in 2018 the Internal Audit Department conducted financial and operational reviews of various departments and processes. Assessments and recommendations based on review results are submitted to company senior management along with the reports in which matters where improvements may be made in keeping with the philosophy of continuous development are also pointed out. Besides financial and operational reviews, the Internal Audit Department also conducts follow-up reviews on issues about which senior management was previously informed and it was agreed that measures needed to be taken. Similar risk analysis and audits were conducted in the first 6 months of 2019.
