Press Release

Istanbul – November 15, 2019

JCR Eurasia Rating, by assessing “ **LDR Turizm A.Ş.**” within investment grade, affirmed the credit rating notes ‘**BBB (Trk)**’ on the Long Term National Scale and ‘**A-3 (Trk)**’ on the Short Term National Scale. On the other hand, the Long Term International Foreign and Local Currency ratings were also affirmed at ‘BBB-’. Other notes and details of the ratings are given in the left-hand column.

The Company was established in 2010 in the field of operational leasing with the name of “LDR Turizm Dış Ticaret Ltd. Şti.”, which was changed to “LDR Turizm A.Ş.” (Lider Filo) in 2012. Since then, Lider Filo continues its operations under the name of “LDR turizm A.Ş.”. With its dynamic team who closely follows current trends in the market and focus on customer satisfaction, the Company aims to improve its market share by long and short-term vehicle leasing and enriching its service portfolio with customized financial and technological trends for its customers which mainly consist of corporate firms and SMEs. The recent macroeconomic developments such as the volatility and depreciation of the Turkish Lira in 2018, the weakening debt-service strength of the real sector firms which are the potential customers of the fleet leasers, create certain constraints against the progress of the market.

The Company’s realized capital increase, experienced management team and well-organized risk management infrastructure, leverage ratio below the sector average, boutique service concept aiming for high customer satisfaction, asset quality with a wide customer base which minimizes the risk of non-collection of the receivables, successful hedge techniques, moderate concentration level provided by good sectoral distribution of operations in the operational leasing sector, and the improvement in the profitability of the company as of the first half of 2019 that will contribute positively to the operational and financial structure of the company are considered as positive and strong aspects. However, considering the shrinkage in the sector, the low profitability in the previous periods and the high increase in financial expenses are regarded as negative factors. Taking all of these aspects into account, JCR Eurasia Rating has affirmed the long-term rating of the Company as ‘**BBB (Trk)**’ with a ‘**Stable**’ outlook. On the other hand, developments in the level of compliance of credit usage, adequacy of cash flow, increasing fleet number, absence of sector-specific laws and public authorities to regulate the activities of firms, realization level of budgeted profits and ultimate effects of a prospective bond issue on the Company’s financial statements are other issues to be monitored by JCR Eurasia Rating for further assessments in the following periods.

No separate rating report has been compiled as the resources obtained from the debt issues will be carried in the Company’s balance sheet and has been subject to analysis in the corporate credit rating report. The debt instruments to be issued carry no difference in comparison to the Company’s other liabilities with respect to its legal standing and collateralization. As such, the notations outlined in the corporate credit rating report also reflect the issue rating taking into account aggregated exposure of the issues. The issue ratings do not cover any structured finance instruments. Issue ratings are assigned for both outstanding and prospective debt instruments and incorporate assessments until their maturities.

Although it is assumed that Metin Barokas, possessing almost full power of control, has sufficient propensity and operational support capability as the result of his experience dating back to the establishment of Lider Filo (LDR Turizm A.Ş.), his financial support capacity is not known. In this regard, the Company’s ‘Sponsor Support Grade’ has been defined as **(3)**, indicating an ‘adequate level’.

On the other hand, regardless of the support from its shareholders, taking into account the current market share, increasing fleet size, equity level, growth rates, competitive advantages conferred through contracts to numerous customers in a diverse range of industries and minimizing collection risk, presence of an experienced management team, it is considered that the Company has reached a level of experience to manage the incurred risks on its balance sheet provided that the current customer base and effectiveness in the market is preserved along with the maintenance of current macro-economic conditions. In the light of such circumstances, the Stand Alone grade of the Company has been assigned as **(BC)**.
