21. TAX ASSET AND LIABILITIES

The Group accounts deferred tax assets and liabilities for temporary timing differences rooted from differences between legal financial statements and financial statements prepared in accordance with TFRS. The differences in question are caused generally by the fact that some profit and loss accounts come up in different periods in legal financial statements and financial statements prepared in accordance with TFRS. These differences are specified below.

Turkish tax legislation does not permit a parent company and its subsidiary to file a consolidated tax return. Therefore, deferred tax positions of the firms with deferred tax assets is netted against those with deferred tax liabilities and reflected on a separate-entity basis.

The Law was published in the Official Gazette on 5 December 2017. Accordingly, the corporate income tax rate for all companies will be increased from 20% to 22% for the years 2018, 2019 and 2020. Therefore, deferred tax assets and liabilities shall be measured in accordance with materiality at the tax rate of 22% that are expected to apply to these periods when the assets are realised or the liability is settled, based on the Law that have been enacted. For the periods 2021 and after, the reversals of temporary differences will be measured by 20%. At the same time, the exemption to be applied over the capital gains from the sales of the real estate taxpayers held for at least two years was reduced from 75% to 50% with the regulation published in the Official Gazette dated 5 December 2017.

The rate applied in the calculation of deferred tax assets and liabilities for entities in Turkey is 22% (2019: 22%), for entities in Saudi Arabia and Kazakhstan is 20% (2019: 20%), for entities in Egypt 22,5% (2019: 22,5%), and for entity in Kyrgyzstan 10% (2019: 10%), for entity in the United Arab Emirates is zero (2019: Zero).

The Company and its Turkish subsidiaries are subject to Turkish corporate taxes. Provision is made in the accompanying financial statements for the estimated charge based on the Group's results for the period.

Companies file their tax returns between 1st-25th of April following the close of the accounting year to which they relate. The companies with special accounting periods, file their tax returns between 1st-25th of fourth month after fiscal year end. Tax authorities may, however, examine such returns and the underlying accounting records and may revise assessments within five years.

24. NATURE AND LEVEL OF RISKS DERIVED FROM FINANCIAL INSTRUMENT

Foreign currency risk management

Transactions in foreign currencies expose the Group to foreign currency risk.

This risk mainly arises from fluctuation of foreign currency used in conversion of foreign assets and liabilities into Turkish Lira. Foreign currency risk arises as a result of trading transactions in the future and the difference between the assets and liabilities recognized. In this regard, the Group manages this risk with a method of netting foreign currency denominated assets and liabilities. The management reviews the foreign currency open position and provides measures when needed. The group mainly faces USD, EUR, GBP, CHF and DKK currency risks.

The foreign currency denominated assets and liabilities of monetary and non-monetary items are as follows:
