I. GENERAL INFORMATION

a) About Kafein

Kafein Yazılım Hizmetleri Ticaret A.Ş. (Kafein; the Company) was founded in 2005 to develop software solutions. Having always focused on customer satisfaction, Kafein offers Telecommunication BSS (Business Support System), application development, test / test automation, project management, turnkey software solution, consultancy, outsourcing and managed services as well as data analysis, data mining and data archiving services. Kafein has always maintained its growth since establishment and improved competencies each and every year. Kafein continues operations in strict conformance with quality standards and methodologies. Among the institutions that benefit from the services by Kafein, there are the biggest telecommunication companies, insurance companies, banks, international retail and manufacturing companies of Turkey.

- **MISSION**

To contribute to the development of the industry by offering high quality services and turnkey solutions and products to corporate firms based on Service Level Agreements (SLAs).

- **VISION**

To serve as the pioneering service and product provider company in all the telecommunication, energy and financial industries and be the most preferred company among the leaders of such industries.

- **TARGET**

To grow with clients by adding value to them.

b) Reporting Period

This report covers the information of the period between 01.01.2021 and 30.09.2021.

Website	www.kafein.com.tr
Area of Activity	Software Development
NACE Code	62.01.01 (Computer Programming Activities)

d) Area of Activity

Kafein Yazılım Hizmetleri Ticaret A.Ş. is engaged in software services. The fields of activity of the Company can be analysed under the following six items:

- 1. Managed Services**
- 2. Turnkey Solutions**
- 3. Outsourcing Services**
- 4. Technology & Software Development**
- 5. Software Product (License) Sales**
- 6. Innovative Products and Services**

Kafein carries out all the operational processes according to ISO 9001 quality management system and offers services in compliance with these processes. The Company provides turnkey solutions in insurance, transportation, banking, tertiary and, in particular, telecommunication industries.

1. Managed Services

Managed service is the management of a part of the IT system of a company on behalf of a client and rendering it as a service. All or a part of software development, analysis, test and operation services can be considered as managed services. Managed services also include personnel supply, employment and management. The difference between personnel supply under managed services and standard employment is;

Outsourcing	Managed Services
Personnel selection is made by the client.	Personnel selection is made by the supplier company.
Performance review is made by the client.	Performance review is made by the supplier company.
The number of personnel is defined by the client.	The number of personnel is defined mutually; the goal is to render services.
A mixed team is established for the same purpose and goal.	The team consists of a single company.
Fund of knowledge is transmitted in a limited way.	Fund of knowledge is created within the company.
Payment is made according to the days of work by personnel.	Payment is made according to rendered service.

Kafein offers managed services and assigns a team for software development, analysis, test and operation in accordance with a Service Level Agreement (SLA) to be concluded with the client. The quality of these services is measured with the comparison of key performance indicators mutually defined by the parties.

This approach attributes the cost of works and personnel to Kafein. Therefore, it serves not only as an approach to reduce management costs but also as a competitive element that improves performance and efficiency.

Thanks to the knowledge and experience acquired with managed services, Kafein has become one of the key suppliers according to the clients. This ensures longer terms of business and agreements for Kafein.

2. Turn-Key Solutions

Kafein offers turnkey solutions tailored for the needs of clients. These solutions are implemented by a project team specially established for the purpose. With turnkey solutions, software development and integration requests are completed and offered for use within a particular time as defined by clients. These activities are performed with a certain discipline and method by a special team. With these projects, Kafein offers the softwares developed by the Company or business partners to the clients of telecommunication, service, insurance and transportation industries, in particular.

In this sense, Kafein implements the project management methodologies that are accepted as the industrial standards. These methodologies are identified with the consideration of the complexity and size of projects, the profile and structure of clients, and the parameters to be regarded for project team. Similarly, project managers use various project management tools throughout the projects.

In general, a project management process consists of the following stages:

- Identification and analysis of client needs - Scope Analysis
- System analysis and design
- Solution development or adaptation, integration
- Tests
- Commissioning
- Formation and maintenance of operation and maintenance processes
- Project closing, lessons learned and process evaluation
- Observation process

3. Outsourcing Services

Kafein employs and assigns personnel according to the knowledge and experience levels required by clients. The personnel assigned to render services are selected by clients from among the proposed candidates. In this service, client is the party responsible for the management of a dedicated Kafein team and also undertakes the risk for the quality and completion of works

4. Technology & Software Development

Kafein evaluates client needs and technological developments and continues R&D activities in technology and product development areas. In this regard, the Company evaluates the support and incentives by TUBITAK, KOSGEB and similar other institutions, and aims to contribute to the national software vision of Turkey. The developed products and technologies do not only meet the demands of the national market but are also intended for export. Kafein attaches great importance to the following 4 areas;

- Internet of things
- Big data analysis
- Mobile Applications
- Security

5. Software Product (License) Sales

Recently, Kafein has been engaged in license sales in Turkey as the business partner of many international software and technology companies. Having initiated license sales in Turkey by collaborating with the leading companies of the relevant industries, the Company desires to expand operations to abroad.

ROBOTIC PROCESS AUTOMATION

Robotic Process Automation refers to automatic processes and operations realized by employees through software robots. Robotic Process Automation reduces the errors in operations, enhances service quality and ensures cost and time saving for manual and repetitive procedures.

END TO END SOLUTION TO PROTECTION OF PERSONEL DATA

It enables organizations to discover, properly configure, process, and store sensitive data in compliance with the Personal Data Protection Law (KVKK) and General Data Protection Regulation (GDPR), and in accordance with legal requirements.

End-to-end Solution for Personal Data Protection ensures sensitive data detection, accurate configuration, efficient processing and storing in compliance with Personal Data Protection Law (KVKK) and General Data Protection Regulation (GDPR).

CYBER SECURITY

Cybersecurity can be defined as the aggregated methods, technologies and processes that help protect the confidentiality, integrity and availability of computer systems, networks and data against cyber-attacks or unauthorized access. The main purpose of cybersecurity is to protect all corporate assets from both internal and external threats.

In the current period, the IMG & Security team has been working in this field. By completing trainings and accreditations, our company has become an Authorized Solution Partner with Microfocus International Plc – Arcsight (Log Management and Security Operations); Mentis Software (Dynamic Data Masking, Database Monitoring and Firewall) and NetWitness Software - RSA (Network, Endpoint Threat Detection and Response) products.

SMART SENTIMENT ANALYSIS

Smart Sentiment Analysis enables the recognition, comprehension, and classification of visitor sentiments with the immediate analysis of real-time images. Smart Sentiment Analysis makes it possible for institutions to understand their customers and offer the correct service.

INSURANCE MANAGEMENT SYSTEM

Enabling efficient insurance inventory and policy tracking, Insurance Management System also facilitates premium management and allows tracking with monthly reports.

K-BI

K-BI is a business intelligence platform with which companies can automatically do performance analyses and reporting according to their needs. K-BI allows live data and 3D data visualization by creating graphics and comparisons.

K-AWARD

K-Award is an awarding system which uses a scoring method to measure the performance and in-house activities of employees. K-Award is integrated into the human resources system of companies and is based on the principles of playing.

e) Capital and Partnership Structure

The issued capital of Kafein Yazilim Hizmetleri Ticaret A.S. consists of 19.750.000 shares with TRY 1.00 as the nominal value of each share.

By 30.09.2021, the distribution of the issued capital of Kafein among the partners is as follows:

Partners	Group A	Group B	Group C	Total Capital Amount (TRY)	Capital Share (%)	Voting Right (%)
Ali Cem Kalyoncu	183.333	183.333	4.571.716	4.938.382	25,00	40,48
Public			14.811.618	14.811.618	75,00	59,52
TOTAL	183.333	183.333	19.383.334	19.750.000	100,00	100,00

f) Privileged Shares and Explanations for the Voting Rights of Such Shares

As specified under article 7 of the Articles of Association, the shares of the Company are classified under three groups as Group (A), (B) and (C) shares. Group (A) and (B) shares are registered shares and represent the special rights and privileges defined in the Articles of Association. Group (C) shares are bearer shares and are not furnished with special rights and privileges.

During a capital increase, Group (A), (B) and (C) shares will be issued in proportion to the amount of Group (A), (B) and (C) shares, respectively, to represent the increased capital. In case of a capital increase where new shares are restricted, only Group C shares will be issued.

According to article 9 of the Articles of Association, 2 members are to be elected from among the Group A shareholders or the persons assigned by them while 1 member is to be elected from among the Group B shareholders or the person assigned by them in case the Board of Directors consists of 6 or 7 members. Similarly, 3 members are to be elected from among the Group A shareholders or the persons assigned by them while 1 member is to be elected from among the Group B shareholders or the person assigned by them in case the Board of Directors consists of 8 members.

One among the Group A shareholders or a person assigned by them takes office as the Chairman of the Board while one among the Group B shareholders or a person assigned by them serves as the Vice Chairman of the Board.

As specified in article 15 of the Articles of Association, each and every Group A and B shareholder has 15 (fifteen) voting rights except for board member elections while each and every Group C shareholder has 1 (one) voting right in the ordinary and extraordinary general assembly meetings.

It is accepted on general assembly dated 12.04.2021 and has been registered by Istanbul Trade Registry Office as of 15.04.2021.

IV. RESEARCH AND DEVELOPMENT ACTIVITIES

Carried out at the Technology Development Zone of Yildiz Technical University the projects concluded between 01.01.2021 and 30.09.2021 or in progress by Kafein as part of R&D works are as follows chronologically:

#	Project Name	Date of Commencement	Date of Completion*	Project Summary/ Purpose
1	<i>Telco 1.5L Digitalization Automation Project</i>	<i>1.06.2019</i>	<i>31.03.2021</i>	<i>The project aims to perform Level 1.5 automation procedures with robotic processes without human intervention using Artificial Intelligence Integrations and UiPath tool. Human-free processing with robotic processes targets to reduce error margins, ensure saving on time and resources, allow faster standardization and realization of corporate processes, and, thus, improve efficiency.</i>
2	<i>Smart Platform to Assist Treatment and Follow-up Process of Parkinson's Disease</i>	<i>1.06.2020</i>	<i>1.06.2021</i>	<i>The aim of the project is to produce an analytical solution that will support the remote monitoring of the treatment processes of Parkinson's, a chronic disease. Within the scope of this project, which can be used by patients, relatives, and doctors; A mobile platform supported by data mining, image processing and artificial intelligence is being developed.</i>
3	<i>Foramind Project</i>	<i>14.04.2021</i>	<i>14.06.2021</i>	<i>Foramind is an "Online Mind Mapping Platform". It is the first domestic product of Mind Maps, which is one of the rising and gaining development tools in the world. Mind mapping is an effective technique that helps you visualize your thoughts and communicate them to others. Can be used for problem solving and planning, topic repetition and presentations.</i>
4	<i>Telco Network Monitor Project</i>	<i>3.10.2019</i>	<i>30.06.2021</i>	<i>In order to prevent potential delays and damages which may arise due to human error especially as regards to Network, the project aims to track the network devices of customers and keep statistics with a system. In this regard, the project plans to take immediate and real-time actions against malfunctions, completely remove human error and improve efficiency. In consequence of the project, we expect a better workflow, zero error, increased satisfaction, and decreased costs.</i>

5	Digital Sales Automation Platform	12.12.2019	12.12.2021	The project aims to provide efficiency in sales operations by ensuring instantaneous field monitoring and customer visit route planning and direction with the use of IOT-supported systems. Present customer visits and customer needs and purchases will be stored at “Data Warehouse” systems, and potential new sales offers will be created and the field will be supported with data using the models in the Big Data.
6	Telco Transformation Project, Phase II	13.12.2019	13.12.2021	The project helps to create a play list on the Mobile Music Application of the client according to the music played or streams listened to by end-users.
7	Smart Assistant	16.03.2020	16.03.2022	The project aims to use artificial intelligence in order to ensure the understanding of customer needs and appropriate response to such needs with a customer-based approach. The areas using smart assistant include reminder services, audible reading of messages, location services, voice calls and message writing processes.
8	Reseller Management System Project	18.05.2020	18.05.2022	The project intends to respond to the maintenance requests and demands from the clients in the telecommunication industry, prevent human errors by automating manually operated Dealer and User creation processes and improve efficiency.
9	Telco Online Processing Centre, Phase IV	2.06.2020	2.06.2022	The project aims to carry out the authentication, session management, asset management and similar other processes of the web applications of the online processing centers of telecommunication companies from a single center by protecting and integrating Legacy systems with a secure system
10	Interface Project	10.06.2020	10.06.2022	The project intends to improve monthly sales figures by renewing customers’ cart and purchase screens on the website. Besides, the project ensures that customers are directed to desired subjects by using a webchat supported with artificial intelligence. This allows less labor and time for the call center.
11	Collection Risk System Project	10.06.2020	10.06.2022	The project intends to respond to the maintenance requests and demands from the clients in the telecommunication industry, prevent human errors by automating manually operated Dealer and User creation processes and improve efficiency. Furthermore, the

				project aims to re-develop former systems with new technologies.
12	Telco Premium System Development Project Phase 2	1.07.2020	1.07.2022	With the project, a platform will be created where the customer can automate the premium processes and transparently present the outputs to the dealers. With the source system analysis, areas that may be subject to premium will be determined, related data will be taken considering the large data volume, a structure will be designed in which the calculation engine can work with performance, reporting layers will be created that dealers can access within their authority, and dealers will be able to see their current status.
13	New Generation E-Commerce Platform Software Project	3.07.2020	3.07.2022	The project aims to develop the model which will ensure the best shopping experience according to the information collected from customers and products.
14	Kafein Sentiment Analysis Project	13.07.2020	15.07.2022	The project aims to identify and categorize the sentiments expressed with facial mimics. For the algorithm to enable such categorization, we plan to use Convolutional neural network (CNN). Image processing parameters can comprehend and interpret data as designed beforehand. Using databases including various faces, the algorithm comprehends and analyses human sentiments by categorizing the shots received from video images.
15	Digitalization Infrastructure Project for Telecommunication Companies Phase II	18.07.2020	18.07.2022	The project aims to ensure consistency among all the data on SMS, Online, IVR, mobile and similar other channels which are created by telecommunication companies in order to render better service, and to create a common infrastructure so as to ensure consistent client experience.
16	Marketing Solutions Modules Project Phase II	14.09.2020	20.09.2022	It is aimed to improve the harmonized infrastructure within ICT and Marketing Solutions Portfolio of Telco customers, and to reduce the workload of the customer's teams by decreasing the received bug number within the customer and to make the modules more stable.
17	Income Practices Control Project	29.11.2020	29.11.2022	The problems in customer IT systems regarding the applications which are working integrated with each other is one of the problems that are constantly experienced. It is

				aimed to develop a system that will ensure controls and keep statistics by following the revenue practices of our customers in IT systems, and to automate the actions to be taken in case of inconsistencies, preventing human error and minimizing errors that may cause income losses. For this, it is aimed to increase the success rate by using machine learning and Big Data analysis techniques in addition to the methods in existing software in the market. These techniques will be used to improve the sample subscriber list chosen for invoice control, aiming to prevent human error, detect incompatibilities between systems more effectively and minimize revenue loss.
18	Telco Script Project	29.11.2020	29.11.2022	In the project, it is aimed to attract more users by adding new modules to the application in order to create a social media platform together with the Telco customer. It is planned to include filtering and story modules on the pictures.
19	Telco Siebel Sales Force Module Replacement	1.10.2018	1.01.2023	The project aims to automatize the communication between the sales team management system and team leaders/managers and their sales personnel and, thus, to create a more efficient and affordable solution.
20	Telco Campaign Creator Module	1.02.2021	1.02.2023	It was developed for a telecommunications company. It is aimed to provide to end user an opportunity to create and use the packages they want by eliminating the necessity of choosing among the packages determined by the marketing teams.
21	Robotic Process Design	1.06.2019	01.02.2023	The project refers to the design and coding of all the procedures in Windows operated systems using RPA (Robotic Process Automation) technology. This project plans to minimize human errors in various procedures, finalize processes within a shorter time with robots and ensure continuous process standards.
22	Genesis ADM, Phase II	21.01.2019	14.03.2023	The project plans transition from on-premises systems to systems managed on cloud as part of the completion of new development requests and the transition to micro service infrastructure.

23	Personal Data Protection Law	4.12.2019	17.03.2023	The project covers all the technological procedures which are necessary for compliance with Personal Data Protection Law (KVKK), which is a version of GDPR (General Data Protection Law) of EU harmonized according to the conditions in Turkey. Client ensures full compliance with the Personal Data Protection Law at the end of the project.
24	World Commodity Index (WCI) Development Project	18.03.2021	18.03.2023	It involves the development of a commodity exchange system for a Netherlands-based company. Instead of the existing Legacy system used by the company, it is aimed to develop a system suitable for the future and new usage patterns, thus increasing customer satisfaction and profitability of the company.
25	New generation smart CRM Project	12.07.2021	12.01.2023	It is aimed to develop a simple and easy-to-use CRM platform that will enable institutions to manage their businesses quickly and securely from a single place. The SMART CRM Platform includes features such as revenue estimation, invoicing and reporting on the portal, and customer tracking.
26	MSP Test Environments Management Project Phase I	01.07.2021	01.07.2023	It is aimed to create a new MSP test environment in order to present test applications related to the project and transformation processes of our Telco customer. With the shift left methodology to be made within the scope of the project, increasing efficiency in internal processes in all products and transformations, reducing response times, time saving, general process improvements and implementation of various accelerators and tools (such as artificial intelligence, machine learning, etc.) will be made.
27	Script Automation Project	13.07.2021	13.07.2023	The project intends to prepare automatic scripts by making Unix and DB optimizations so as to ensure stable and uninterrupted operation of test media. The alarm systems in the project will refer possible issues to relevant teams using an early warning system. The project will also ensure automatic case opening thanks to the integration of tools tested with the alarm system.
28	Microreporter Project	01.09.2021	01.09.2023	It is an integrated reporting product with dynamic reporting.

*After the “Completion Date”, depending on the status of the product, extensions for these projects can be obtained, a new phase can be started, the productization stage can be progressed or the customer can start to use it.

VI. RISK AND EVALUATION BY THE BOARD OF DIRECTORS

The risks with possible effects to the Company and the financial investments are as follows:

a) Industrial Risks

- There are certain legal regulations and restrictions which Kafein should comply with. Kafein is a company engaged in software industry. The Turkish government grants certain privileges to the industry. However, these privileges may be removed in time, and the privileges granted to Kafein may decrease or completely disappear.
- The activities of Kafein may be subject to the effects of economic inconsistency. There may be political and/or economic inconsistencies in Turkey and the world. Kafein and the industry may be affected negatively and have retarded activities.

b) Operational Risks

- Kafein ensures sales revenue mainly from only a single industry. Although Kafein carries out sales transactions electronic communication companies for more than 10 years, the Company is still subject to the risk of sectorial condensation. Certain issues which may arise in the electronic communication industry may affect Kafein negatively.
- The bidding stage of tenders and the commencement periods of undertaken projects may exceed prescribed times. In general, Kafein makes sales revenue by winning tenders and making project offers to clients. In case of extended bidding stage or longer project periods due to uncontrollable reasons may create a negative impact on the expected profitability of Kafein.
- There may be delays in tender and project preparation and implementation processes: Material errors during the preparation or price and specification evaluation processes of

the tenders wherein Kafein ensures participation may lead to a failure in timely performance and/or decrease in profitability from a project.

- There may also be risks due to the location of the head office: The head and the R&D offices of Kafein are situated in the Technopark of Yildiz Technical University which takes place in Esenler, Istanbul. The activities of Kafein may be affected in case authorized bodies decide to move the Technopark or amend the relevant regulation.
- The operations of the softwares and business support systems developed by the Company fail. The operations of the softwares and business support systems developed by Kafein may fail. The Company's personnel may need to put effort for long periods so as to remove these failures.

c) Other Risks

Apart from the foregoing, the Company may be subject to various financial risks due to the activities. These are credit risk, liquidity risk and interest rate risk.

Credit Risk: Credit risk becomes a question when the other party cannot perform its contractual liabilities. For current period, the Company's other short-term receivables from non-affiliated parties are TRY 197.186 while short-term trade receivables from non-affiliated parties are TRY 46.992.958.

Liquidity Risk: Liquidity risk refers to the risk of failure to perform funding liabilities and arises from various reasons that lead to a decrease in fund sources such as undesired market conditions and/or decrease in credit score. For current period, the Company's short- and long-term liabilities are TRY 74.290.409 and TRY 15.938.725, respectively, which corresponds to TRY 90.229.134 in total.

Exchange Risk: Exchange risk is the effect of the changes in exchange rates. For current period, Company is not under serious exchange risk since it has foreign asset position equals to TRY 12.693.044

Interest Rate Risk: Interest rate risk may occur when the changes in the interest rates of the market cause fluctuation in the price of financial instruments. Sensitivity to interest rate risk is associated with the inconsistency of the maturities of assets and liabilities to a great extent. The Company manages this risk with a natural measure which is ensured by balancing sensitive assets and liabilities. For current period, the Company has TRY 13.500.626 cash and cash equivalents which are subject to interest risk.

d) Risk Management

The Company is under industrial condensation risk. Apart from that, the Company risk management plan focuses on the minimization of the negative effects of the uncertainties in financial markets on the Company's financial performance.
