## **5. Conclusion**

In this context, the estimated net proceeds amounting TRY 399,000,000, which is expected to be obtained from simultaneous capital increase and decrease that is planned to be carried out for the purpose of reducing the effect of the current capital loss and the financing expenses caused by bank loans and to strengthen the capital structure of our Company, will be used for repayments of principal installments (TRY 395,000,000) and interest payments (TRY 15,425,149) of bank loans, all in Turkish Lira with an average of 8.1% interest cost.

In the event that the net proceeds to be obtained from issuance would not cover the principal installment and interest payments amounting to total of TRY 410,425,149, the remaining amount will be covered by other sources of our Company; and if the net proceeds to be generated from the issuance would be more than the mentioned amount, such funds will be used for repayments of other financial debts of our Company.

As a result, the total of proceeds from capital increase will be used for the payments of financial debts in order to strengthen the capital structure of our Company and to achieve a robust financial structure by reducing our Company's debt level.
