6. Effect of COVID-19 Outbreak on Group Operations:

The Group has been implementing several contingency plans to mitigate the potential negative impacts of COVID-19 on the Group's operations and financial statements. It has been some partial hitches in sales process due to lockdowns and due to closure of some sales channels in countries where the Group operates in line with the slowdown in global markets and beer/ beverage industry. Meanwhile the Group has taken series of actions to minimize capital expenditures, expenses and inventory level and has reviewed current cash flow strategies to maintain strong balance sheet and liquidity position. Lifting of curfews and decrease in restrictions regarding to pandemic had positive effect on both market demand and the Group's operations.

The Group management has evaluated the potential effects of COVID-19 outbreak and reviewed the key assumptions estimations used in proportion of the interim condensed consolidated financial statements. In this concept, Group has performed impairment test for financial assets, inventories, property, plant and equipment, right-of-use assets, deferred tax asset, goodwill and brands and do not anticipate any material impairment loss in the interim condensed consolidated financial statements as of September 30, 2021.

7. Sustainability:

Our company has published its 2020 Sustainability Report. The report includes our Positive Impact Plan strategy, our focus areas and our performance and progress in them, and the Sustainability Goals for 2030 that we announced this year. According to our 2030 Goals determined in line with the United Nations Sustainable Development Goals guide, we aim to;

MANAGEMENT COMMENTS

"I am very happy to deliver strong results for another quarter. Eased restrictions along with the increased mobility led to a successful volume performance in the third quarter. On top of 9% volume growth achieved on a consolidated basis the robust growth in per unit prices yielded a topline growth of over 30%. While in July, Russia has recorded the highest-ever monthly beer sales, similarly the soft drink volumes in Turkey have hit its record-high monthly level. Our profitability margins on the other hand was below last year due to cycling a high base of last year. The margins were also impacted from the recent hike in commodity and raw material prices" **commented Mr. Can Çaka, Beer Group President and Anadolu Efes CEO**

In beer group, we sustained our volume growth momentum similar to the first half of 2021, thanks to the superior performance of international beer operations led by Russia and CIS countries. In soft drinks, Turkey and Pakistan had another solid quarter, also CIS managed to grow by double-digits.

It is very encouraging that Russia had almost double-digit growth in the period despite last year's high base. The growth was assisted by favorable market dynamics but we also benefitted from the development of our premium and NABLAB segment as well as adjacent categories. Despite the pandemic, the strong results achieved in Russia since the beginning of the year were as a result of our superior execution capabilities, our dedication to commercial excellence also to excellent portfolio management by offering the right choice to consumers. Ukraine on the other hand had a challenging quarter once again due to higher pricing over competition. In CIS countries, we continued our leadership with successful market implementations and differentiated offerings including non-alcoholic and flavored beer. In line with our strategy to expand our geographic footprint, beer export volumes expanded significantly, where exports to China, Belarus and MENA regions showed double-digit increases.

In Turkey, we continued to invest in our "+1 Relaunch" and increase engagement with our consumers. As part of Company's strategy to own innovative leadership, we launched "Efes Glutensiz" the first gluten-free beer produced in Turkey, which was developed in our innovation center in İzmir. I am very excited to see strong dynamics despite a very short period of time; since the launch.

As of end-of September, in our soft drinks operations the Uzbekistan acquisition was completed; marking another milestone for our Company. I believe that with its strong growth potential, it will make a significant contribution to our growth dynamics going forward.

Rising commodity prices, fluctuating FX rates as well as the high inflation environment have already started to pressurize our profitability performance since the beginning of the quarter. However, we have already started to take actions across the board to address these challenges by implementing price increases as well as using hedging tools to limit the impact on our margins for the rest of the year and for 2022. Our strong positions in the operating markets, our wide premium brand portfolio, strong pricing power, tight expense management skills will be the determinants to be able to overcome these headwinds.

Anadolu Efes' **consolidated sales volume** marked another strong performance in 3Q2021, and reached 35.8 mhl, yielding 9.2% growth with the contribution of both business lines. While in beer group Russia and CIS operations supported volume growth, soft drink operations posted double-digit expansion with superior performances delivered in Turkey, Pakistan and Kazakhstan.

Consolidated net sales revenue grew by 34.9% to TL 11,787.0 million in 3Q2021 with FX-neutral basis increase of 22.3%. Per hl net revenue increase was mainly coming from price increases through the year. Topline also benefitted from premiumization in beer group and proactive RGM actions and better discount management. In 9M2021, net sales revenue grew by 39.4% reaching TL 28,333.6 million.

Consolidated EBITDA (BNRI) increased by 12.8% year-on-year to TL 2,356.1 million; lagging behind the revenue growth due to the gross margin pressure across the board. There was a decline in OpEx margin in international beer operations thanks to efficient management of expenses although cycling an already tight base. In soft drinks, there was an increase in direct marketing expenses as a result of re-opening of the on-premise channel and eased restrictions in most of the operating countries. In 9M2021, EBITDA (BNRI) reached TL 5,140.7 million with a margin of 18.1%; slightly below last year.

Anadolu Efes posted TL 556.4 million **net income** in 3Q2021 versus TL 449.0 million in 3Q2020. Despite higher financial expenses in beer group and non-cash provision for spare-parts in soft drinks, which had one-off negative impact on the bottomline, net profitability was supported by higher operational profitability as well as the gain on land sales in CCI. Accordingly, in 9M2021, net profit reached TL 1,266.7 million versus TL 688.8 million in 9M2020.

It was another quarter with significant cash generation where Anadolu Efes' **Free Cash Flow** grew by 20.5% year-on year, on top of an already a very high level in 3Q2020. Successful working capital performance in both business lines together with tight capex management in soft drinks yielded TL 2,294.8 million free cash flow in 3Q2021 bringing up 9M2021 level to TL 4,248.2 million. Consolidated **Net Debt to EBITDA (BNRI)** improved slightly compared to 1H2021 and was realized at 0.8x as of September 30, 2021; despite the acquisition of Uzbekistan operation during the period.

Beer group sales volume had a strong performance in 3Q2021 as well and reached 11.1 mhl with 4.4% increase year-on-year, despite cycling a high base of last year. The volume growth was attributable to the strong performance achieved in international beer operations; which significantly outperformed our expectations in the quarter. As a result, in 9M2021 beer group volumes marked a year-on-year increase of 4.3% reaching 29.2 mhl.

International beer operations' volumes grew by 6.2% year-on-year to 9.5 mhl in 3Q2021 as a result of remarkable volume performance delivered primarily in Russia and Georgia. International beer operation's year-on-year volume increase was 4.4% in 9M2021 taking up the volumes to 25.5 mhl. Despite the high base of last year, **Russian** beer volumes were up by high-single versus last year in 3Q, where July volumes were the highest monthly sales ever reported as a result of favorable weather conditions. The volumes in the quarter benefitted from higher demand in the market but it was also supported by exports. In line with our long-term strategy, there has been an expansion in adjacent categories' volumes as well. Our value share expanded compared to last year as a result of better pricing and premiumization. The premium segment continued its double-digit growth in this quarter as well benefitting from the good performances of Essa, BUD, Hoegaarden and Stella Artois brands. **Ukraine** was the only international operation posting volume decline in the quarter due to unfavorable weather conditions especially in September together with the continued impact of higher pricing compared to competition. **CIS countries'** volumes continued to be strong, with double-digit growth achieved in Georgia and mid-single digit growths delivered in Kazakhstan and Moldova. There has been significant improvement year-on-year in on-trade sales following the eased restrictions during summer period. Increased communication in all touchpoints to build and strengthen brand equity together with the improvements in route-to-market helped our performance during the period. **Turkey** volumes decreased by 5.2% year-on-year in 3Q2021 following a very strong quarter in 2Q. Despite the increase in on-trade volumes versus last year, the forest fires that raged across Turkey's southern provinces for nearly two weeks affected hotel reservations as well as the traditional trade sales during the peak season. Accordingly, in 9M2021, Turkey beer operations' volumes grew by 3.6% year-on-year to 3.7 mhl.

Beer Group sales revenue increased by 32.5% year-on-year to TL 4,993.2 million in 3Q2021. The FX-neutral increase was at 16.6%. **International beer operation's revenue** was up by 35.6% year-on-year with an FX-neutral basis increase of 15.0% and reached TL 3,956.5 million in 3Q2021. The strong topline performance in international beer operations was assisted by higher volumes as well as better pricing.

Favorable product mix and increased contribution of operations with higher rev/hl also supported the revenue performance in the quarter. **Turkey beer sales revenue** grew by 21.9% year-on-year to TL 1,016.4 million in 3Q2021. The price increase implemented during the quarter assisted topline and revenue/hl increase in 3Q was realized at 28.6% being almost in line with its level in the 1H despite full opening of on-trade channels which has lower contribution to per hl prices. As a result, beer group sales revenue in 9M2021 reached TL 11,969.5 million with a year-on-year increase of 31.3%

Beer group gross profit grew by 19.4% to TL 1,939.6 million in 3Q2021; with a margin of 38.8%. In international beer operations, gross margin declined as a result of the year-on-year higher fx hedge rates as well as the increase in raw material and commodity prices which started to impact gross profitability since the beginning of the quarter despite strong pricing. Turkey beer's gross margin was also below last year, negatively impacted by volume decline as well as the pressure coming from raw material and commodity price increases. Higher share of on-trade compared to last year as well as the shift in consumer demand to can packaging also affected gross profitability. As a result, beer group gross profit was TL 4,455.4 million; yielding a margin of 37.2%, 211 bps below last year.

The pressure on the gross profitability in 3Q2021 was reflected to **Beer group EBITDA (BNRI)** despite year-on-year savings in international operation's OpEx which was realized despite an already tight level of last year; thanks to our Zero-Based Spending program. The difference in EBIT (BNRI) and EBITDA (BNRI) performance was related to the limited increase in depreciation expenses in Russia in 3Q2021 versus a year ago. Thus, in 3Q2021 beer group EBITDA (BNRI) increased by 5.1% to TL 716.7 million taking up 9M2021 level to TL 1,381.9 million. EBITDA (BNRI) margin was realized at 11.5% in 9M2021 compared to 13.9% a year ago.

Beer Group net income increased from TL 30.5 million in 3Q2020 to TL 97.3 million in 3Q2021. The year-on-year improvement in absolute EBIT (BNRI) was translated into bottom-line despite year-on-year higher financial expenses. The increase in financial expenses was due to higher interest expenses as a result of TL devaluation against hard currencies as well as the increase in borrowing costs in Turkey compared to last year. Thus in 9M2021, bottomline reached TL 602.5 million net income in 9M2021 improving significantly over last year.

Beer Group Free Cash Flow was recorded as TL 434.9 million in 3Q2021 being almost parallel to last year's level. Free Cash Flow in the quarter was again supported by notable working capital management in Russia benefitting from the trade receivables and payables performances; which is going to be normalizing at the end of the year. On top of an already high level in 1H, free cash flow in 9M2021 reached TL 1,519.1 million versus TL 687.0 million a year ago.

OPERATIONAL PERFORMANCE - SOFT DRINK GROUP**MANAGEMENT COMMENTS**

Burak Basarir, CEO of Coca-Cola Icecek, commented: "CCI's results in the third quarter reflect the continued business momentum across our operations. We are happy to deliver the highest ever quarterly sales volume, solid topline performance, and healthy margins. On top of 11% volume growth on a yearly basis, our net sales revenue per unit case on an FX neutral basis grew by 14%. Despite upward price trends in global commodity markets and supply-side bottlenecks, we managed to deliver strong profit growth and margins in 3Q2021.

Our business benefited from the increased mobility and eased restrictions as vaccinations gathered pace in most of our key markets during the quarter.

Having hedged the majority of our commodity needs for 2021, the pressure of high commodity prices on our cost base was limited. Despite cycling a very strong quarter of 3Q2020, where CCI recorded its highest margin in history, our EBITDA increased by 17% with a 24% margin in the third quarter of 2021, still significantly above historical averages. As guided before, the margin contraction is due to the unsustainably high base of the last year. As we continue to navigate the pandemic environment, we are fully on track to deliver in line with the guidance and the quality growth algorithm in 2021, thanks to our brands, adaptive business model, prudent financial policy, and agile mindset.

Turkey operation had a very successful quarter, achieving the highest summer season sales. This was delivered by the relentless focus on serving consumer needs, excellence in execution, and digitizing customer relationships. Favorable weather conditions and partial recovery in the tourism sector were other positive contributors. Volume grew 15% in the third quarter. Revenue growth management initiatives and improving channel mix with recovery at on-premise outlets contributed to the robust topline performance in Turkey.

On the international front, we recorded 9% volume growth in 3Q2021. Pakistan continued building on its sound infrastructure and grew 8% in the quarter on the back of higher outlet penetration, improved route to market capabilities, better execution, and effective promotion management. Smooth execution of price adjustments and refreshment summer offerings assisted healthy topline growth in Pakistan. Central Asia operations maintained strong momentum with double-digit volume growth mainly driven by Kazakhstan, Azerbaijan, and Kyrgyzstan.

As we move towards the year-end, some of the headwinds continue impacting our operations. The Covid-19 variants and the increasing number of cases in our countries create uncertainties for the rest of the year, especially in the upcoming winter. The upward price trends in global commodity markets resulting from strong demand and supply-side bottlenecks lead to a higher cost environment and continue to put pressure on margins. However, we are confident to deliver in line with our 2021 guidance as we continue to exercise financial discipline, tight opex management, along with raw material hedging initiatives taken throughout the pandemic. We expect to face cost pressures on our 2022 margins resulting from higher commodity prices. We work on various mitigation plans to sustain our profitable growth, including but not limited to RGM initiatives, widening our supplier base, strong collaboration within the Coke system, and locking in physical & financial commodity hedges where possible. Leveraging learnings from the pandemic period, we focus on lean portfolio management and the generation of cash flows for the rest of the year.

As of the 29th of September, we completed the Uzbekistan acquisition, and we are excited to consolidate it to our operations. We believe the country offers significant growth potential. Integration work

is proceeding at full speed. By the end of the year, we expect to provide more precise guidance on this new business's impact on our consolidated results.

As the pace of recovery among our markets motivates us, we continue to keep our cautious stance while having full confidence in the strong potential of our business and the strength of our people. We will continue to act as One Team, strive to create value for all our stakeholders, and keep working for a healthy, sustainable, and profitable future at CCI.”

2021 OUTLOOK

As we are heading to the last quarter of the year, the uncertainties and challenges which we should keep an eye on are still present. While COVID-19 and its variants continue to pose several risks going forward, the increasing trend in the commodity and raw material prices together with the high inflationary environment already started to affect our financials since the beginning of 2H. While we keep our 2021 beer group volume and revenue guidance intact, we are cautiously reiterating our EBITDA margin guidance. On the other hand, Soft Drink operation's previous guidance at the end of 1H2021 was given on an organic basis. The addition of Uzbekistan Operation in the last quarter of 2021 will only impact soft drink's consolidated results by a couple of percentage points at volume and net sales revenue while creating a slight dilution on EBITDA margin. However, given the strong business momentum year-to-date and increased visibility till the end of the year, there is a slight upside potential to CCI's original organic guidance on volume and currency neutral net sales revenue which is also reflected on Anadolu Efes' topline guidance as well. Therefore,

Consolidated sales volume is expected to grow by mid-to-high single digits (*previously: mid-single digit*)

Total Beer sales volume is to grow by low-single digit (*no change*)

Consolidated Soft Drinks sales volume is to grow by low-to-mid teens (*previously: high-single digits*) including the 4Q impact of Uzbekistan

Consolidated Net Sales Revenue is expected to grow by high-teens to low twenties on FX-Neutral basis, with the contribution of both business lines (*previously: high-teens*)

Total Beer revenue is expected to grow by low-teens on FX-Neutral basis (*no change*)

Total Soft Drinks revenue is expected to grow by high twenties to low thirties growth on FX-Neutral basis (*previously: by low-to-mid twenties*) including the 4Q impact of Uzbekistan

2021 outlook reflects management expectations and are based upon currently available data. Actual results are subject to future events and uncertainties including but not limited to macro-economic, financial, geopolitical and political risks, which could materially impact the Company's actual performance.

REGARDING ANADOLU ETAP

Anadolu Etap is currently Turkey's largest fruit growing and fruit juice processing company. The Company currently generates more than 60% of its revenues through exports to a wide geography ranging from Europe to Middle East & Africa, CIS countries to South East Asia. The Company has been investing in its operations in Turkey where it currently runs 8 farms with a total area of 30,000 decares where 5 million trees are planted.

Anadolu Etap has two lines of business, one is production of fruit concentrate and second is the fresh fruit plantation and sales. The fresh fruit plantation line of the Company required continuous investment in the initial years of operation and the return is generated after trees come to a certain maturity. Anadolu Etap is estimated to have passed the initial investment period and more than 80% of trees have already reached 80% of maturity.

The company has close to TL 1 billion revenues as of 31.12.2020 where fruit concentrate business currently makes up more than 2/3rd of EBITDA. Fruit sales have a relatively lower margin which is expected to increase going forward. The company has completed the phase of investment and capex requirement is expected to be limited with maintenance expenses within 1-2 years.
