Explanations	

In line with Türk Telekom Group's strategic investment plans and sustainability agenda, we shared that our Company plans to accelerate its Solar Power Plant (SPP) investments in the near future, in order to reduce our carbon footprint, contribute to climate risk management, and create financial value.

As part of this agenda, Turkish Electricity Transmission Corporation (TEİAŞ) has informed our Company that in addition to the 317.8 MWe installed capacity allocated within the framework of the relevant Article 5/1h of the Regulation on Unlicensed Electricity Generation in the Electricity Market, an additional 88 MWe of installed capacity has been allocated. TEİAŞ will be providing its opinion about technical details in the next step of the process. With the additional capacity granted, the total installed capacity of 405.8 MWe corresponds to nearly 65% our current total electricity consumption.

Investments in solar power plants are planned to be undertaken in Diyarbakır, Ağrı, and Sivas provinces, on lands to be leased for 29 years from the General Directorate of National Property of the Ministry of Environment, Urbanization and Climate Change of the Republic of Türkiye.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we're personally liable for the disclosures.
