Explanations	

Soleil Yenilenebilir Enerji A.Ş. which is 100% subsidiary of Margün Enerji Üretim Sanayi ve Ticaret A.Ş. has been granted a production license by the Energy Market Regulatory Authority (EPDK) on 30.07.2020 in accordance with Law No. 6446 on the Electricity Market and relevant regulations, to carry out production activities for 49 years, starting from 30.07.2020, for the Özmen-1 Solar Power Plant project based on solar energy in Muğla province. With this license, it sells the electricity it produces at a price of 13.3 USD cents per kWh for a period of 10 years starting from the temporary acceptance date of 23.10.2020, under the state purchase guarantee in accordance with Laws No. 5346 and No. 6094

In accordance with the "Regulation on Storage Activities in the Electricity Market" published on 19.11.2022 the provision has been added that "Legal entities holding a production license can establish an integrated storage unit within a licensed production facility." In accordance with this, an application has been submitted today to the Energy Market Regulatory Authority (EPDK) to install an integrated storage unit with a capacity of 2.064 MWp for our Özmen-1 GES project with an installed capacity of 20.17 MWp

After the installation of the electricity storage unit in the production facility, the production facility is expected to generate around 860,000 kWh/year of additional electricity and revenue by storing excess electricity produced beyond its capacity. This capacity increase will also help our company produce more green energy and reduce carbon emissions.

It is respectfully announced to the public and our investors.
