Announcement Content	
Explanations	

As per the license amendment application submitted to the Energy Market Regulatory Authority, the installed capacity of Ali Metin Kazancı Antalya Combined Cycle Natural Gas Power Plant has been reduced from 1,150 MW to 900 MW, therefore the power plant's annual production capacity is also reduced from 9 billion KWh to 7 billion KWh. Since the cancelled production unit has not contributed to the actual energy generation in 2018, the licence revision does not have any effect on the energy generation or operating income of Ali Metin Kazancı Antalya Combined Cycle Natural Gas Power Plant in 2018.

Respectfully announced to the public.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
