Akenerji in Brief

Having commenced operations in 1989 as an autoproducer group under the umbrella of the Akkök Group of Companies, Akenerji Elektrik Üretim A.Ş. (“the Company”) has been operating as the first independent electricity generation company established as an autoproducer since 2005. Being one of the largest players with its experience of more than 33 years in energy sector of Turkey, Akenerji focused to become an integrated energy company by providing energy systems optimization and management services for industrial and commercial customers on energy efficiency services as well as its electricity generation and wholesale electricity trading operations.

Akenerji is a strategic partnership of joint venture between Akkök Holding, and Europe’s leading power company, the ČEZ Group and has the sole capacity to meet 3% of Turkey’s power need, with its total installed power of 1.224 MW as of today. By putting the hydroelectric power plants and wind power plants into use in stages, Akenerji in total achieved a total renewable energy generation capacity of 320 MW and the Erzin natural gas combined cycle plant with a generation capacity of 904 MW has started its operations on July, 2014.

Project works for Kemah Hydroelectric Power Plant, with an installed capacity of 198 MW and a production capacity of 560 GWh, which is planned to be established in Erzincan, are continuing.

The nature of business and registered addresses of the subsidiaries of the Company (“Subsidiaries”) are provided below:

V – INVESTMENTS

As a result of the completed investments, taking into consideration of the long-term energy policy of Turkey, Akenerji sustained its competitive position with an installed power of 1.224 MW and a flexible portfolio that can adapt to rapidly changing market conditions. In addition to its current operational portfolio, the project works for Kemah Hydroelectric Power Plant, with 198 MW, which is planned to be established in Erzincan, are on-going.

The fundamental strategy of Akenerji is to operate its existing power plants to the optimum level in line with market prices. The operations and maintenance works of all power plants of Akenerji, included in its portfolio, are performed by its own personnel in an attentive and effective way. Additionally, to comply with the changing market conditions and to strengthen its competitive position, Akenerji constantly reviews the strategies and takes necessary steps to achieve a more efficient and innovative way of generation.

VI – FINANCIAL SOURCES

VII – RISK MANAGEMENT POLICY AND INTERNAL AUDIT MECHANISM

The Board of Directors establishes internal control systems, including risk management and information systems and processes that aim at minimizing the effects of risks that would affect the stakeholders of the Company, particularly the shareholders, by obtaining the suggestions of the related committees of the Board of Directors.

The Company's risk inventory is one of the most important follow-up tools used in Akenerji's risk management activities. The risk inventory includes the operational, financial, reputational and strategic risks of the Company. Risks with high or very high level risk scores are monitored at the level of the Board of Directors. Detailed action plans are created for such risks, and a risk owner is assigned for each of these risks. The risk owner is responsible for managing the related risk within the framework of the agreed action plan. Thus, the risk management philosophy grew into a permanent item on the agenda of routine business of Akenerji executives. Updated in line with sectoral and institutional developments, this philosophy has become an integral part of the Company's applications.

The current internal control system, particularly enhancing the efficiency and productivity of Company operations, ensuring reliability in financial reporting, and compliance with applicable law and legislation, is being audited by the Akenerj Internal Audit Department in coordination with the Internal Audit Departments in Akkök Holding A.Ş. and ČEZ a.s., in accordance with the annual internal audit plan. The outcome of the audit is reported to the Audit Committee. The effectiveness of internal auditing operations has been reviewed during the year by Audit Committee. Opinions of the internal auditor, external auditor, or other Company executives have also been obtained when required.
